

MORE PRACTICE. NO CAR. SAFER NEW DRIVERS.

Driving simulators that let students rehearse hazards, weather and distraction in the classroom, before they face them in traffic. Built and supported in Tampa by a service-disabled veteran-owned small business.

HOW A CLASS USES IT

- **One drives, the room learns.** The screen faces the class, so every decision becomes a discussion.
- **Pause, rewind, rerun.** Stop at the decision point, talk it through, run it again.
- **Identical scenarios.** Every student faces the same hazard, so results can be compared.
- **Fits a class period.** Rotations run inside a normal bell schedule. No vans, no parking lot.

WHAT STUDENTS PRACTICE

- Hazard recognition: pedestrians, brake lights, red-light runners
- Emergency braking and evasive steering
- Rain, fog, night driving and distraction
- Merging, lane changes and speed judgment
- Scenarios written to your curriculum by our instructor

\$10,995
per simulator

BASE SYSTEM, TURNKEY

Aluminum cockpit with full driver adjustment, 8 Nm direct-drive force-feedback wheel, 34" curved display, pre-configured PC and commercial driving simulation software for unlimited students. Includes freight delivery, assembly and testing before it ships, two-hour remote instructor onboarding and a first-year support package. Optional upgrades quoted on request.

WAYS TO START

RENT

A unit delivered and set up for a safety week, event or demonstration.

PILOT

A simulator on site for a term, so staff evaluate it with real students before buying.

PURCHASE

An owned system, delivered 2 to 3 weeks from purchase order.

WHO BUILDS IT

Scenarios are written by Duncan Conner, a Motorsports Safety Foundation Level 2 certified racing instructor who coaches new drivers at our Tampa facility.

FOR PROCUREMENT

Registered in SAM.gov, CAGE 1CQU1, UEI ZZ3VWDGY88K9. District purchase orders accepted. W-9 and SDVOSB documentation on request.

Please note: this is a practice and training simulator. It is not a state-certified driver education simulator or a state-licensed driver education course, and simulator time does not count as behind-the-wheel instruction. Academy Sim Racing does not currently have simulators installed in Florida school districts; the programs described are services we offer and can deliver.
